Artificial Intelligence and Machine Learning (AIML) student with a strong foundation in Python, Machine Learning, SQL, and Data Science. Hands-on experience through AI/ML projects, coding practice, and hackathons, with a passion for building practical, real-world solutions. A quick learner and problem solver seeking an opportunity to apply technical skills, gain industry experience, and contribute to innovative projects.

PROJECTS

Spam Detection Using Machine Learning

- Developed a machine learning-based system to classify messages as spam or legitimate.
- Worked with text preprocessing and classification techniques.
- Built as a mini project associated with KRUTANIC.

Smart Crop – AI-Based Farmer Advisory System

- Proposed an AI-based mobile application for farmers.
- Features include crop advisory, soil recommendations, weather alerts, pest/disease detection, market prices, multilingual support, and voice assistance.
- Designed with the goal of providing accessible technology for rural farmers.
